EXPERIENCE

Job Experience

GGN Infotech, React JS Developer   **May/2024 - Till Date**

· Participated in engineering and development of open source frontend and web application using HTML, CSS, JAVASCRIPT and REACT JS.

· Implemented filtering content functionality based on certain conditions given by user, implimented error handling throughout the web application.

· Designed the front-end elements, mapped the routes of the application and edited a Bootstrap-based admin template to suits project needs.

· Regulated version control with branches and reviewed pull requests on GitHub.

· Collaborated with cross-functional teams, including designers and backend developers, to deliver seamless user experiences.

· Debugged and resolved issues to enhance application performance and reduce bugs.

Kochar Infotech, CSE   **Oct/2022 - May/2024**

Worked as a CSE in multiple LOB's like Meesho Reverse & Meesho Pre-claim.
Handled customer escalation on real time.
Worked as a SME as well in the same LOB's as mentioned above.

PROJECTS

· Worked on Admin Panel of an App just like MT5.
- Made Tables for rendering Lists of Accounts and their Details.
- Render Lists of Active Trades through Firebase Realtime DB.
- Used WebSocket for showing current prices and Unrealized PNL.
- Used API's for various Admin Roles.

· Made a Chatting App in which we can interact with each other via chatting. We use Firebase Firestore for save user data and chats get realtime data from their and use it for live chats.

· Made a History page for an forex trading app in which we can check all open and closed positions of user and also their P&L, Commission, Swap and all data related to trades.

· A Weather Web Application that uses the API to get the real time weather imformation and show it in UI according to the user input.

· Built a Calculator using React components, UseState() Hook and using Array, Functions and HTML elements.

· A To-Do Web Application that helps to make a todo list according to the input.
